

IGV and Cohen Elevators Ltd: on the same wavelength!

A strategic alliance leading to a strong relationship to achieve the common goals of growth, quality and customer retention.

Cohen Elevators, an Israeli company founded in 1978, has been collaborating with IGV for over 20 years, fully sharing the founding principles of a lift brand known for its sophisticated design and extensive customization.

Cohen has acquired a fundamental role in the Israeli lift market for the installation and maintenance of a lift fleet with more than 1200 units, employing a team of 28 professionals and qualified technicians..

These numbers perfectly convey the meaning of this close collaboration, which started back in 2000 and has been consolidating over the time, thanks to the high performance and flexibility of DomusLift, the IGV emblematic product.

Thus, it is no coincidence that this teamwork with Cohen Elevators has turned out to be a great success based on solid grounds, where the perfection of details meet the constant research.

Processes and finishes redesigned with a modern style which, combined with technological innovation, offer solutions blending aesthetics and functionality.

Zachi Michlis (Cohen Elevators' owner), Michele Suria (IGV CEO), Gianfranco Mussini (Area Manager) and Giacomo Lodovici (Manufacturing Manager).

Kindest Regards.
